

Sage Park Middle School Cape Cod Field Experience
Health Considerations

MEDICATIONS:

1. List all medications your child is currently taking or using on the Medical Information Sheet.
2. For each pill, inhaler, injectables, steroid salve, or syrup we must have a doctor's permission to administer.
This includes all OVER-THE-COUNTER medications!

Use an "Authorization for the Administration Medication" form

NOTE: Vitamins, most creams, herbals, and eye drops do not require permission slips.

3. All medication must be in the **ORIGINAL** packaging.
4. For most medications, try to pack only the amount your child will need for the five days.
5. Let us know if your child sometimes has adverse reactions to their medications.

SPECIAL DIETS

It is best that you let us know ASAP of any special dietary considerations for your child. We will be able to make arrangements in advance for your child's dietary needs.

It is extremely important that we know of any food allergies!

SPECIAL CARE

If your child will require specialized medical care while on the on the trip, we need time to make arrangements. Please contact your team representatives as soon as possible.

MEDICAL HISTORY FORM

Please provide **ALL** the requested information
Make sure to include the **insurance information**
*Name of insurance(s) and pertinent numbers
